

# MOD 18 STEELWORKS

# MOD 18 STEELWORKS

## What is 18/8 Stainless Steel?

- 18 refers to the amount of chromium present. Chromium provides rust and corrosion resistance and durability.
- The number 8 represents the amount of nickel. Nickel provides additional rust resistance, increases strength and allows for high polishing capabilities.
- A higher percent of nickel makes for a higher grade of steel and increases the value.

## New from Service Ideas

Our exclusive collection offers a variety of beverage, table, serving and bar pieces that are all 18/8 stainless steel. Each item is available in a brushed or polished finish and is dishwasher safe. Use them together to create a signature style or mix and match them with your existing look to add a modern touch.
